

## Department of Defense Train in N Scale

deLuxe is proud to announce a pair of special armored unit train sets in N scale. It will consist of 2 four-car sets of new Department of Defense 150-ton 6 axle flat cars with the following loads:

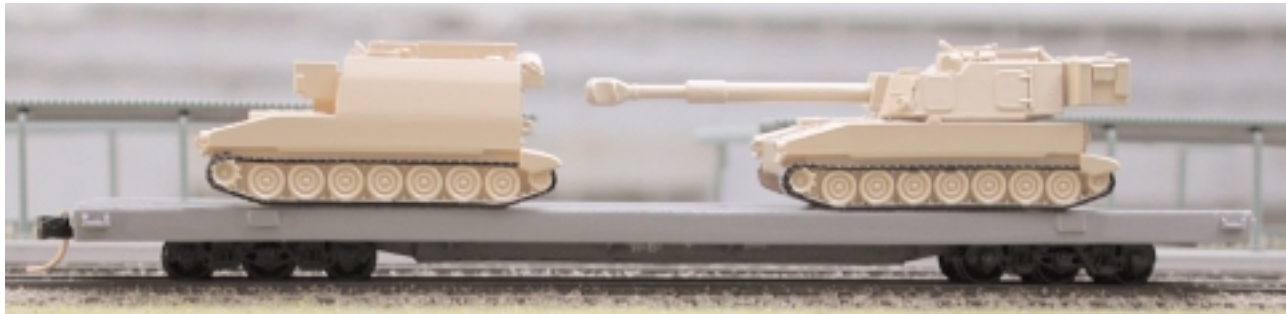

### Set 1:

- Paladin Self Propelled Howitzer and M113 Armored Troop Carrier.
- Paladin Self Propelled Howitzer and M113 Armored Troop Carrier.
- M992 Armored Ammunition Carrier and M577 Armored Command Vehicle.
- M992 Armored Ammunition Carrier and M113 Armored Troop Carrier.

### Set 2:

- M1 Abrams Tank and M901ITV "Hammerhead" Anti-Tank TOW Missile Vehicle.
- M1 Abrams Tank and M901ITV "Hammerhead" Anti-Tank TOW Missile Vehicle.
- M1 Abrams Tank and M113 Armored Troop Carrier.
- M113 Armored Troop Carrier and M577 Armored Command Vehicle.

Cars will be equipped with Micro-Trains Line trucks and couplers. Etched metal tie-downs will be included. Flat cars will be painted green with DODX lettering and 8 different road numbers. Because of the complexities and costs of producing these runs, they will only be made available to deLuxe Auto-Ship Program retailers. MSRP is \$174.95 for each set. Set 1 is scheduled for completion in February. Set 2 will release about 1 month later. We hope you will join us for this very special project.

Pilot model of 150 ton flat car (un-painted) shown with production versions of M992 and Paladin.

This prototype photo shows the lettering on the flat car and the tie-downs for the load.

Production models of the M577 and M113.
