

Union Pacific's RoadRailer Adventure!

Frank Kenny is proud to present this run of deLuxe innovations RoadRailer trailers in Union Pacific. Union Pacific leased 180 RoadRailer trailers and operated them in various corridors, with Chicago to Dallas being the most common route. The UP RoadRailer trailers are available in 10-Packs with 10 different road numbers. The 10-Pack includes a CouplerMate rail bogie so the set can be connected to any N scale locomotive. All 10 road numbers plus a free CouplerMate Rail Bogie is \$155.50

A RoadRailer® train has to be seen to be believed. The concept of a highway trailer sitting on one rail bogie while the front end leans on the trailer ahead for up to 125 units is strange but a reality on thousands of miles of railroad both prototype and N Scale! The deLuxe innovations RoadRailer® system works like the prototype. Trailers are easily converted for rail or highway service and back again!
